PROFILE

Computer Science student graduating in 2027 with experience owning products end-to-end, from understanding user needs and making product decisions to building, shipping, and operating production software.

EDUCATION

Universitas Indonesia Aug 2023 — Expected Jul 2027
Bachelor of Computer Science – GPA: 3.88 Depok, Indonesia

PROFESSIONAL EXPERIENCE

Product Researcher & Developer Mar 2026 — Present
Apple Developer Academy @BINUS Jakarta, Indonesia

- Build and ship native Apple-platform applications with SwiftUI in multidisciplinary teams from product discovery through implementation and launch.
- Conduct user research, rapid prototyping, and usability testing to identify user needs and guide product decisions.
- Translate research insights into product requirements and technical solutions.

Software Engineer Intern Mar 2025 — Nov 2025
QuorumAI Remote

- Built production frontend and backend services supporting AI-powered meeting management workflows.
- Optimized REST APIs and PostgreSQL queries, reducing average API latency by approximately **40%**.
- Shipped 5+ features across multiple services, including auth, AI integrations, SSE, object-storage access, and more.

Software Engineer Jun 2024 — Present
Freelance Remote

- Owned client projects end-to-end, from requirements discovery through development and deployment.
- Worked directly with clients to understand business needs, prioritize features, make product and technical decisions, and translate requirements into maintainable software.
- Built and operated full-stack production applications across PaaS, virtual machines, and Kubernetes, with automated deployments using GitHub Actions and ArgoCD.

LEADERSHIP & PROJECTS

Vice Person in Charge (DevOps), Software Engineering Division Mar 2025 — Jan 2026
COMPFEST Universitas Indonesia

- Led 10+ developers building and operating event platforms serving over **2,000 daily users**.
- Improved engineering and deployment workflows by building CI/CD pipelines and internal automation, reducing deployment time by approximately **40%**.

Researcher & Developer, Trisurya – Local Language-Powered Omnichannel Chatbot Jan 2025 — Apr 2025

- Built a multilingual LLM application for public-service information using RAG with Neo4j and PostgreSQL.
- Published and presented the project at an IEEE conference.

AWARDS

- 1st Place** — Web Application Competition, Politeknik Negeri Semarang (2025)
- 2nd Place** — FindIT Hackathon, Universitas Gadjah Mada (2025)

TECHNICAL SKILLS

- Programming:** Go, Python, TypeScript, Java, SQL, Swift
- Backend & Data:** REST APIs, PostgreSQL, Redis, Neo4j, SSE, S3-compatible object storage
- Cloud & Infrastructure:** Linux, Docker, Kubernetes, Terraform, AWS, GCP, GitHub Actions, ArgoCD
- Product:** Requirements discovery, user research, rapid prototyping, usability testing, product scoping
- Machine Learning:** PyTorch, RAG, YOLO, Computer Vision
- Languages:** Indonesian — Native; English — Professional working proficiency
