PROFILE

Computer Science student and software engineer with hands-on experience deploying production microservices and machine learning systems in cloud environments.

EDUCATION

Universitas Indonesia Aug 2023 — Expected Jul 2027
Bachelor of Computer Science – GPA: 3.88 Depok, Indonesia

PROFESSIONAL EXPERIENCE

Product Researcher & Developer Mar 2026 — Present
Apple Developer Academy @BINUS Jakarta, Indonesia

- Develop user-centered products in multidisciplinary teams from problem discovery and validation through implementation and testing.
- Built iOS, macOS, and watchOS based applications and leveraging Apple and Swift’s libraries & frameworks.
- Conduct user research and translate product requirements into accessible technical solutions.

DevOps & Machine Learning Engineer 2025 — 2026
Freelance Remote

- Designed and deployed a production microservices architecture on Tencent Kubernetes Engine (TKE), integrating services with real client databases and production workloads.
- Established CI/CD pipelines for controlled deployments using GitHub Actions & ArgoCD.
- Built a YOLOv8-based CV model for Indonesian license plate detection & recognition, achieving >90% accuracy.

Software Engineer Intern Mar 2025 — Nov 2025
QuorumAI Remote

- Developed production backend services in Go for an AI-powered meeting management platform.
- Designed and optimized REST APIs and PostgreSQL queries, reducing average API latency by approximately 40%.
- Implemented production features including authentication, SSE, secure object-storage access, and many more.

AI/ML Mentor Nov 2025 — Dec 2025
Pusat Ilmu Komputer UI × PT Medco Energi Internasional Tbk Jakarta, Indonesia

- Mentored industry professionals in developing end-to-end machine learning solutions for practical business use cases, covering experimentation, model evaluation, and technical communication.

LEADERSHIP & VOLUNTEERING

Vice Person in Charge (DevOps), Software Engineering Division Mar 2025 — Jan 2026
COMPFEST Universitas Indonesia

- Led 10+ developers building and operating event platforms serving over **2,000 daily users**.
- Designed CI/CD pipelines with GitHub Actions and automated engineering and operational workflows.

Backend Developer Jul 2024 — Oct 2024
Recess Indonesia Remote

- Developed backend functionality for an audiobook streaming platform and collaborated with clients to translate accessibility needs into product requirements.

TECHNICAL SKILLS

- Cloud, DevOps & Automation:** Linux, Bash, Docker, Kubernetes, Terraform, Ansible, GitHub Actions, CI/CD, AWS, GCP, Tencent Cloud, ArgoCD, Crossplane
- Programming:** Go, Python, TypeScript, Java, SQL, Swift
- Backend & Databases:** REST APIs, PostgreSQL, Redis, Neo4j, Supabase, S3-compatible object storage
- Machine Learning:** PyTorch, YOLOv8, Computer Vision, Object Detection
- Languages:** Indonesian — Native; English — Professional working proficiency
