ABOUT ME

Software engineer with experience building web-based applications and cloud infrastructure. Passionate about scalable software architecture, machine learning, distributed systems, and intelligent applications.

EDUCATION

Universitas Indonesia Aug 2023 — Expected Jul 2027
Bachelor of Computer Science – GPA: 3.88 Depok, Indonesia

EXPERIENCE

Developer Mar 2026 — Present
Apple Developer Academy Jakarta, Indonesia

- Design and develop native Apple-platform applications using SwiftUI following Apple’s Human Interface Guidelines.
- Conduct user research, rapid prototyping, and usability testing to build accessible, user-centered experiences.
- Collaborate within multidisciplinary teams to deliver end-to-end products from ideation to implementation.

Software Engineer Intern Mar 2025 — Nov 2025
QuorumAI Remote

- Developed production backend services in Go supporting AI-powered meeting management workflows.
- Designed and optimized REST APIs and PostgreSQL queries, reducing average API latency by approximately **40%**.
- Delivered 4+ production features across multiple microservices.

Web Developer Jun 2024 — Present
Freelance Remote

- Delivered end-to-end applications for multiple organizations from requirement analysis to deployment.
- Collaborated directly with clients to translate business requirements into maintainable production-ready software.

AI/ML Mentor Nov 2025 — Dec 2025
Pusat Ilmu Komputer UI × PT Medco Energi Internasional Tbk Hybrid

- Mentored professionals on end-to-end AI and machine learning projects aligned with real business use cases.
- Guided participants in model evaluation, experimentation, and translating technical results into business insights.

SELECTED PROJECTS

Researcher & Developer, Trisurya – Local Language-Powered Omnichannel Chatbot Jan 2025 — Apr 2025

- Developed an LLM-powered multilingual chatbot using GPT API and Retrieval-Augmented Generation (RAG).
- Designed a hybrid knowledge architecture combining Neo4j and PostgreSQL for context-aware information retrieval.
- Published and presented the project at an IEEE conference.

Vice Head, Software Eng. Division, Website Infrastructure & Automation – COMPFEST Mar 2025 — Present

- Led a team of 10+ developers to build and maintain event platforms serving over 2,000 daily users.
- Designed CI/CD pipelines reducing deployment time by ~40%.
- Developed internal automation tools and Improved platform reliability through monitoring.

AWARDS

- 1st Place — Web Application Competition, Politeknik Negeri Semarang (2025)
- 2nd Place — FindIT Hackathon, Universitas Gadjah Mada (2025)

TECHNICAL SKILLS

- Software Engineering:** Go, TypeScript, Java, SQL, NoSQL, Redis, REST APIs, Software Architecture
- AI & Machine Learning:** OpenAI API, RAG, LangChain, YOLO, NeRF, Stable Diffusion
- Automation, Cloud, and DevOps:** Docker, Kubernetes, GitHub Actions, CI/CD, AWS, GCP, Tencent
